WEDNESDAY, AUGUST 24, 1892.

A western paper says an effort is being made by certain persons to convert the belief that there is water UNDER THE BOTTOM of the wheat in the Chicago elevators. There would be a mistake in this, as no one in the world has heard such a rumor except as it is stated by the paper in question. The statement referred to is peculiarly cool audie to the effort that some of the Chicago warehouses contain a quantity of wheat that is believed to be the several years old and good in quality. If the wheat does fail it would be the duty of the warehousemen to pool it, as one of conditions, which they have not done. It is simply absurd ing on a mass of rumors to allege that there is "no bin wheat" in Chicago. There is not the subject of consideration.

The petition in favor of the admission of the anti-Jury Commissioner law to the vote of the people was forwarded to executive, having been signed by more than the necessary "one thousand electors." The petition is now in the hands of the officers of the Chicago Association, and will be presented to the Judges of the several courts of record as soon as they return from their vacations. There is ample time, for not thirty days' notice of the fact that the law is to be submitted is required—not sixty days, as some imagine. Still, it is best to have the Judges advised as soon as possible, so as to prevent future delays even. It is not necessary that all the Judges shall act. A majority vote will be sufficient, but it must be noted to what that if the law is not submitted this year it will not thought. The books of the association—"The Judges of the several courts of record, or a majority of them, may, in their discretion, cause the question of the appointment of such [jury] commissioners to be submitted to the vote of the electors of said county the Tuesday after the first Monday of November, A. D. 1892, as set out [illegible] Lloyd notice."

Bolton Hardy Hemyr turned sentiment to his own subjection in explaining both the motive and purpose of his "new philosophy," and it is easy to trace later days of partisan servility that he has been condemned to limit and not his position to such an extent as to provide his indigent patients of four-night-gang fountain. In secret him of inconsistency the favorable term only to appeal from George the candidate to George the author of "Progress and Poverty." But in addition, his platform on which George now stands promises the following:

The extension is to explore conflict with the other provisions of the platform favoring "increased taxation of a tax not according to its to arise but according to its value, to the "exclusion of unnecessary." Such a scheme of taxation necessarily makes the confiscation of private property to land, and it is monstrous for the authors of such a platform to claim that their purpose is "not the destroying of any man in his holding or title," when in the same breath they declare that they will levy taxes so as to extinguish the value of the title or the holding. They will not take the life of the land-owner—only the means whereby he lives. When George has spurned before the public as a philosophic writer he did not then attempt to juggle with phrases and hide a double language. In "Progress and Poverty" he said:

Apparently not entirely gross property to land is entirely.

The test to call from this work there can be no danger that there is to be any land that is not subject to payment of its full rent. Such land is [illegible] Among that kind of landed property

---

Holding that true private property in land was robbery, George did not then pledge himself "not to disturb any man in his holding or title." Contending then precisely the opinion he does today, he proclaimed to the world with a candor and truthfulness now carefully lacking and outlined his program as follows:

We would abolish the tolls of taxing, but would not attempt experimentally, for at one point, doubtful of their effect, thinking we could go on step by step as we found it safe. We would abolish all taxes, national, state and municipal, save a tax upon the value of land irrespective of improvements. We would not stop there, but would go on to abolish all taxes that fall on the products of labor, on the wages of labor, on the capital employed in production, on the savings of labor, on the necessaries of life, on the means of obtaining a livelihood, on everything that labor produces, or that is necessary to the production of wealth. We would thus abolish all taxes that fall on industry, on commerce, on improvements, on population, on all the things that are now fined and punished as crimes, and we would put in place of all these taxes a single tax upon the value of land.

This extension is to explore conflict with the other provisions of the platform favoring "increased taxation of a tax not according to its to arise but according to its value, to the "exclusion of unnecessary." Such a scheme of taxation necessarily makes the confiscation of private property to land, and it is monstrous for the authors of such a platform to claim that their purpose is "not the destroying of any man in his holding or title," when in the same breath they declare that they will levy taxes so as to extinguish the value of the title or the holding. They will not take the life of the land-owner—only the means whereby he lives. When George has spurned before the public as a philosophic writer he did not then attempt to juggle with phrases and hide a double language. In "Progress and Poverty" he said:

Apparently not entirely gross property to land is entirely.

The test to call from this work there can be no danger that there is to be any land that is not subject to payment of its full rent. Such land is [illegible] Among that kind of landed property

Royal Baking Powder is Superior to All Others in Strength and Purity.

Certified Extracts from the report of Hon. E. Miall, Commissioner, and Professor William Saunders, F. R. S. C., Public Analyst, Inland Revenue Department, Ottawa, Canada, pages 4, 10, 11:

"Eight samples of baking powder have been analyzed; six were found to be adulterated, the proportion of adulterant varying from 10 to 60 per cent. The other two consisted of a mixture of bicarbonate of soda and pure cream of tartar without any adulterant."

"Royal. Result of analysis: contains cream of tartar, carbonate of soda; pure."

"Price's. Result of analysis: contains matter insoluble in water 24.16 per cent, consisting of starch and carbonate of lime; adulterated."

"The Royal Baking Powder is absolutely pure. It is undoubtedly the purest and most reliable baking powder offered to the public." "Dr. Henry A. Mott, Ph.D., U. S. Government Chemist."

"THE FAIR"

RUBBER GOODS.
